

## Area Pro-Disc

### Description

The product family Area is enriched with a new model: Area Pro-Disc.

Area Pro-Disc, in the two OTC and Focus versions, is equipped with a new mechanism/feature capable of managing professional coffee pods in aluminum and compostable materials. The extraction mechanism is solid and reliable, guaranteeing a constant and long-lasting performance.

Area Pro-Disc, with its essential and elegant shapes, is designed for every out-of-home location. Thanks to its capacitive interface equipped with photo-realistic images and a simple and intuitive iconographic display, it can easily dispense from 4 to 8 beverages with direct selection. Furthermore, the coffee dispenser offers 3 different heights of dispensing: 90, 140 and 160 mm, for glasses or cups of different sizes. Finally, the OTC version is also equipped with an integrated cappuccinatore, for the preparation of beverages made with fresh milk, while in both versions the hot water is dispensed by an independent nozzle.

### Accessories

- FR7L refrigerator
- Milk Cooler
- Raising grid for extra-height of dispensing

### Main characteristics

- Management of pods in aluminum and compostable materials
- Semi-automatic expulsion of the pod
- 4 (Focus version) and 8 (OTC version) beverages with direct selection
- 1 button dedicated to free dispensing (OTC version)
- Possibility of connection to the water supply (optional kit)
- Direct selection for American coffee
